

ONE TAIKOO PLACE

where
DYNAMIC
businesses prosper

At Swire Properties we have always been keenly aware of our role in creating inspiring environments for forward looking companies.

One Taikoo Place confirms our commitment to the future with a triple Grade-A rated property that is set to be one of the most sought-after addresses in the city.

The development will take pride of place alongside eight existing properties which have attracted over 300 leading international companies from banking and finance, to legal services, insurance, accounting, luxury brands, consulting, media and advertising services, digital communications and technology.

At the heart of Taikoo Place is a ribbon of bright air-conditioned elevated walkways, that seamlessly connect the office towers, the nearby MTR station and the various facilities, shops and dining spots.

Natural gardens grace every open space with a rich abundance of native plants and trees, while elongated water pools capture attention with their historic reference to the Taikoo Dockyard quays that once characterised the site.

Sustainable Design Features

One Taikoo Place has been planned, designed and constructed with the aim of achieving the highest standards in sustainability. In recognition of these high environmental standards, One Taikoo Place is targeted to receive LEED Platinum, BEAM Plus Platinum and WELL Gold accreditations.

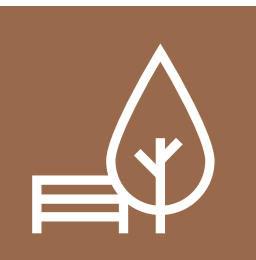

Connecting Places

Elevated walkways and pedestrian-friendly streetscapes enhance existing connections to surrounding buildings and transport hubs.

Natural Ventilation

Buildings within Taikoo Place have been situated to introduce natural ventilation and cooling breezes.

Liveability

Green spaces and outdoor seating have been carefully designed and positioned to reduce urban heat island effects.

Rooftop Solar Panels

One Taikoo Place's roof is 25% green, to reduce the demand for air-conditioning in the building. Solar panels have also been installed to generate renewable energy.

Water Conservation

Recycled rainwater is used to irrigate the gardens and green spaces at Taikoo Square and One Taikoo Place.

Green Technology

Air handling units with electrically commutated plug fans are adopted in One Taikoo Place to achieve greater energy savings.

Waste Recycling

75% of demolition debris has been recycled in compliance with LEED requirements.

Waste cooking oil generated by tenants is converted into bio-diesel to operate a trigeneration system, which will supply combined heating, cooling and power generation to One Taikoo Place; the first of its kind in a commercial building in Hong Kong.

Lighting

High-efficiency lighting fixtures equipped with daylight and motion sensors help minimise energy use.

33%

Annual energy savings exceeding BEAM Plus ¹ baseline performance.

2.5%

Of total building energy to be provided by renewables.

75%

Demolition waste recycled.

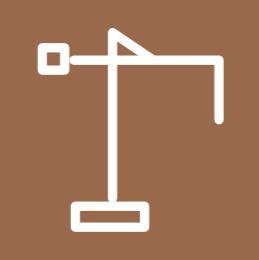

28%

Annual energy savings exceeding LEED ² baseline performance.

>40%

Freshwater savings exceeding BEAM Plus ¹ baseline performance.

60%

Construction waste recycled.

¹ Based on Building Energy Code ("BEC") 2012 Edition as baseline.
² Based on ASHRAE 90.1 2007 as baseline (LEED 2009 for Core and Shell Development).
